|-------------|--|
| Name | Jung Yong Hong |
| Affiliation | Samsung Medical Center, Sungkyunkwan University School of Medicine |
| Country | Republic of Korea |
| Major Field | Medical Oncology |

Educational Background

JY Hong graduated from Yonsei University, College of Medicine, Seoul, Korea. He completed his residency in internal medicine and the fellowship in hematology/oncology at Samsung Medical Center, Seoul, Korea.

Professional Experience

His major specialties are cancer genomics, precision medicine, and cancer immunotherapy. Another major specialty is Korean big data analysis and epidemiological studies collaborating with Prof. JH Park in Korea University Ansan Hospital. Now, he works as a medical oncologist for gastrointestinal cancers and an associate professor in hematology/oncology at Samsung Medical Center, Sungkyunkwan University School of Medicine.

Main Scientific Publications

Hepatocellular carcinoma patients with high circulating cytotoxic T cells and intra-tumoral immune signature benefit from pembrolizumab: results from a single-arm phase 2 trial.

Genome Med. 2022

Changes in Metabolic Syndrome Status are Associated With Altered Risk of Pancreatic Cancer: A Nationwide Cohort Study.

Gastroenterology. 2021

Comprehensive molecular profiling to predict clinical outcomes in pancreatic cancer.

Ther Adv Med Oncol. 2021

Persistent status of metabolic syndrome and risk of cholangiocarcinoma: A Korean nationwide population-based cohort study.

Eur J Cancer. 2021

Association of prediabetes, diabetes, and diabetes duration with biliary tract cancer risk: A nationwide cohort study.

Metabolism. 2021

SIDDS 2022

Seoul International Digestive Disease Symposium 2022

In conjunction with the annual meeting of Korean Society of Gastroenterology

April 16-17, 2022 Virtual Congress

Association between non-alcoholic fatty liver disease and the risk of biliary tract cancers: A South Korean nationwide cohort study.

Eur J Cancer. 2021

Comprehensive pharmacogenomic characterization of gastric cancer.

Genome Med. 2020

EBV-positive diffuse large B-cell lymphoma in young adults: is this a distinct disease entity?

Ann Oncol. 2015

The impact of activated p-AKT expression on clinical outcomes in diffuse large B-cell lymphoma: a clinicopathological study of 262 cases.

Ann Oncol. 2014
